WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut from 12 mm exterior plywood; one gauge per hull shape.
Long edge follows the slope of the frame faces (31.6 deg here).
Hook rests on the gunwale; the lip drops outside the strake.
Notches mark the batten top (230 below the gunwale)
and bottom (300 below the gunwale).
Make it on the first frame: offer up, trim the hook until the
long edge lies flat on the frame face, then cut the notches.
Use: hook over the gunwale at each frame, mark both notches.
