WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Four layers of 50 foam, each a strip 216 wide (inside the cover).
Cut both long edges of every strip at the flare angle, then stack
so each layer sits 31 further outboard than the one below.
Lengths (cover inside): 876, 1,396 (two), 1,096; four layers each.
No glue: the cover and the straps hold the layers together.
Not polystyrene (fuel dissolves it); not open-cell foam.
Check: stack fits the cover with no gap at the corners.

LEVELHULL github.com/BoujeeEnjinia1701/levelhull

Foam core (8, four lengths)

DRAWING NO.	REV	SHEET	SIZE
LVH-DWG-104	P1	1 of 1	ANSI B

SCALE	UNITS	PROJECTION	DATE	DRAWN
1:10	mm		2026-10-24	Amish Chadha

MATERIAL / NOTES
Closed-cell polyethylene foam, 50 mm sheet
