WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Four layers of 50 foam, each a strip 216 wide (inside the cover).

Cut both long edges of every strip at the flare angle, then stack so each layer sits 31 further outboard than the one below.

Lengths (cover inside): 876, 1,396 (two), 1,096; four layers each.

No glue: the cover and the straps hold the layers together.

Not polystyrene (fuel dissolves it); not open-cell foam.

Check: stack fits the cover with no gap at the corners.

LEVELHULL				github.com/BoujeeEnjinia1701/levelhull			
Foam core (8, four lengths)							
DRAWING NO. LVH-DWG-104			REV P1		SHEET 1 of 1		SIZE ANSI B
SCALE 1:10		UNITS mm	PROJECTION 		DATE 2026-10-03		DRAWN Amish Chadha
MATERIAL / NOTES Closed-cell polyethylene foam, 50 mm sheet
